Fire extinguishing media — Halogenated hydrocarbons —

Part 2:

Code of practice for safe handling and transfer
procedures of halon 1211 and halon 1301

Agents extincteurs — Hydrocarbures halogénés —

*Partie 2: Code de bonne pratique pour les procédures de manipulation
et de transfert sans danger des halons 1211 et 1301*

Reference number
ISO 7201-2:1991(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7201-2 was prepared by Technical Committee ISO/TC 21, *Equipment for fire protection and fire fighting*, Sub-Committee SC 6, *Extinguishing media for fire fighting*.

ISO 7201 consists of the following parts, under the general title *Fire extinguishing media — Halogenated hydrocarbons*:

- *Part 1: Specifications for halon 1211 and halon 1301*
- *Part 2: Code of practice for safe handling and transfer procedures of halon 1211 and halon 1301*
