Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7294 was developed by Technical Committee ISO/TC 29, *Small tools*, and was circulated to the member bodies in May 1982.

It has been approved by the member bodies of the following countries :

Austria	Germany, F.R.	Romania
Belgium	Hungary	South Africa, Rep. of
Brazil	India	Spain
China	Israel	Sweden
Czechoslovakia	Italy	United Kingdom
Egypt, Arab Rep. of	Japan	USA
France	Poland	USSR

No member body expressed disapproval of the document.
