Fertilizers — Determination of ammoniacal nitrogen content in the presence of other substances which release ammonia when treated with sodium hydroxide — Titrimetric method

Engrais — Dosage de l'azote ammoniacal en présence d'autres substances libérant de l'ammoniac sous l'effet d'hydroxyde de sodium — Méthode titrimétrique

First edition — 1983-12-15

UDC 631.8 : 543.24 : 546.17

Ref. No. ISO 7408-1983 (E)

Descriptors : fertilizers, chemical analysis, determination of content, nitrogen, ammoniacal nitrogen, volumetric analysis.

Price based on 5 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 7408 was developed by Technical Committee ISO/TC 134, *Fertilizers and soil conditioners*, and was circulated to the member bodies in July 1981.

It has been approved by the member bodies of the following countries :

Austria	Israel	Poland
Brazil	Italy	Portugal
China	Kenya	Romania
Czechoslovakia	Korea, Rep. of	South Africa, Rep. of
Egypt, Arab Rep. of	Mexico	Sri Lanka
France	Netherlands	United Kingdom
Germany, F.R.	New Zealand	USA
Hungary	Norway	USSR

The member body of the following country expressed disapproval of the document on technical grounds:

India
