

INTERNATIONAL STANDARD

**ISO
7576**

Second edition
1990-07-15

Road vehicles — Two-stage fuel filters for compression-ignition engines — Mounting and connecting dimensions

*Véhicules routiers — Filtres à combustible à deux étages pour moteurs à
combustion interne à allumage par compression — Dimensions de montage et de
raccordement*

Reference number
ISO 7576 : 1990 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7576 was prepared by Technical Committee ISO/TC 22, *Road vehicles*.

This second edition cancels and replaces the first edition (ISO 7576: 1982), of which it constitutes a minor revision.

Annex A of this International Standard is for information only.
