Assessment of industrial laundry machinery by its effect on textiles —

Part 3: Flatwork-ironing machines

*Évaluation des machines à laver industrielles par leurs effets sur les
textiles —*

Partie 3: Sécheuses-repasseuses

Reference number
ISO 7772-3:1996(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7772-3 was prepared jointly by Technical Committees ISO/TC 38, *Textiles*, and ISO/TC 72, *Textile machinery and allied machinery and accessories*.

ISO 7772 consists of the following parts, under the general title *Assessment of industrial laundry machinery by its effect on textiles*:

- *Part 1: Washing machines*
- *Part 2: Extracting machines*
- *Part 3: Flatwork-ironing machines*
- *Part 4: Batch-drying tumblers*

Annexes A to D form an integral part of this part of ISO 7772.
