
**Stationary source emissions —
Determination of the mass concentration of
sulfur dioxide — Hydrogen peroxide/barium
perchlorate/Thorin method**

AMENDMENT 1

*Émissions de sources fixes — Détermination de la concentration en masse
de dioxyde de soufre — Méthode au peroxyde d'hydrogène/perchlorate de
baryum/Thorin*

AMENDEMENT 1

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 1 to International Standard ISO 7934:1989 was prepared by Technical Committee ISO/TC 146, *Air quality*, Subcommittee SC 1, *Stationary source emissions*.
