8079

INTERNATIONAL ORGANIZATION FOR STANDARDIZATION • МЕЖДУНАРОДНАЯ ОРГАНИЗАЦИЯ ПО СТАНДАРТИЗАЦИИ • ORGANISATION INTERNATIONALE DE NORMALISATION

"The American National Standards Institute (ANSI) is the primary source and official sales agent for ISO standards in the United States. ANSI was granted an exclusive license to distribute and sell ISO standards, technical reports, drafts and other priced publications within the U S A. Under this license agreement ISO has granted to ANSI the right to reproduce ISO standards and drafts within the territories of the United States"

Aerospace process — Anodic treatment of aluminium alloys — Sulfuric acid process, dyed coating

Procédés de traitement dans l'industrie aéronautique — Traitement anodique des alliages d'aluminium — Traitement à l'acide sulfurique pour revêtement coloré

First edition — 1984-10-15

UDC 669.716.9 : 629.7

Ref. No. ISO 8079-1984 (E)

Descriptors : aircraft industry, aluminium alloys, anodizing, anodic coating, specifications, quality assurance, tests, packing, sulfuric acid

Price based on 3 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 8079 was prepared by Technical Committee ISO/TC 20, *Aircraft and space vehicles*.
