● Evaluation of the performance characteristics of gas analysers

Évaluation des caractéristiques des analyseurs de gaz

First edition — 1985-09-01

UDC 543.271

Ref. No. ISO 8158-1985 (E)

Descriptors : gas analysis, analysers, tests, performance tests.

Price based on 14 pages

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 8158 was prepared by Technical Committee ISO/TC 158, *Analysis of gases*.
