
**Safety, protective and occupational
footwear for professional use —**

Part 2:
Specification for safety footwear

*Chaussures de sécurité, de protection et de travail à usage
professionnel —*

Partie 2: Spécifications pour chaussures de sécurité

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8782-2 was prepared by Technical Committee ISO/TC 94, *Personal safety — Protective clothing and equipment*, Subcommittee SC 3, *Foot protection*.

ISO 8782 consists of the following parts, under the general title *Safety, protective and occupational footwear for professional use*:

- *Part 1: Requirements and test methods*
- *Part 2: Specification for safety footwear*
- *Part 3: Specification for protective footwear*
- *Part 4: Specification for occupational footwear*
- *Part 5: Additional requirements and test methods*
- *Part 6: Additional specifications for safety footwear*
- *Part 7: Additional specifications for protective footwear*
- *Part 8: Additional specifications for occupational footwear*
