Crude petroleum and liquid petroleum products — Volumetric metering of viscous hydrocarbons

*Pétrole brut et produits pétroliers liquides — Mesurage volumétrique des
hydrocarbures visqueux*

Reference number
ISO 9200:1993(E)

ISO 9200:1993(E)**Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9200 was prepared by Technical Committee ISO/TC 28, *Petroleum products and lubricants*, Sub-Committee SC 2, *Dynamic petroleum measurement*.

Annex A of this International Standard is for information only.
