Welded steel tubes for pressure purposes — Technical delivery conditions —

Part 1:

Unalloyed steel tubes with specified room
temperature properties

*Tubes soudés en acier pour service sous pression — Conditions techniques de
livraison —*

*Partie 1: Tubes soudés en aciers non alliés avec caractéristiques spécifiées à
température ambiante*

Reference number
ISO 9330-1 : 1990 (E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 9330-1 was prepared by Technical Committee ISO/TC 17, *Steel*.

It constitutes a partial revision of ISO 2604-3 : 1975 and ISO 2604-6 : 1978.

ISO 9330 consists of the following parts, under the general title *Welded steel tubes for pressure purposes — Technical delivery conditions*:

- *Part 1: Unalloyed steel tubes with specified room temperature properties*
- *Part 2: Electric resistance and induction welded unalloyed and alloyed steel tubes with specified elevated temperature properties*
- *Part 3: Electric resistance and induction welded unalloyed and alloyed steel tubes with specified low temperature properties*
- *Part 4: Submerged arc-welded unalloyed and alloyed steel tubes with specified elevated temperature properties*
- *Part 5: Submerged arc-welded unalloyed and alloyed steel tubes with specified low temperature properties*

Annex A of this part of ISO 9330 is for information only.
