
**Information technology — Computer
graphics and image processing — The
Virtual Reality Modeling Language —**

Part 1:

Functional specification and UTF-8 encoding

*Technologies de l'information — Infographie et traitement de l'image — Le
langage de modélisation de réalité virtuelle —*

Partie 1: Spécification fonctionnelle et codage UTF-8

Foreword

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form a specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. See <http://www.iso.ch> for information on ISO and <http://www.iec.ch> for information on IEC.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75% of the national bodies casting a vote. See <http://www.iso.ch/meme/JTC1.html> for information on JTC 1.

International Standard ISO/IEC 14772 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee 24, *Computer graphics and image processing*, in collaboration with The VRML Consortium, Inc. (<http://www.vrml.org>) and the VRML moderated email list (www-vrml@vrml.org).

ISO/IEC 14772 consists of the following part, under the general title *Information technology -- Computer graphics and image processing -- The Virtual Reality Modeling Language*:

Part 1: Functional specification and UTF-8 encoding.

Further parts will follow.

Annexes A to C form an integral part of this part of ISO/IEC 14772. Annexes D to F are for information only.

This part of ISO/IEC 14772 is distributed as both a hard copy edition and an HTML file which is on the attached CD-ROM. The paper and the electronic versions contain the same material. However, the structure and presentation are more relevant to the document as viewed on-screen. Please note that the electronic file must be viewed using a recent version of a web browser.
