
**Information technology —
Telecommunications and information
exchange between systems — Local and
metropolitan area networks — Specific
requirements —**

Part 5:

Token ring access method and physical layer
specifications

**AMENDMENT 1: Dedicated token ring
operation and fibre optic media**

*Technologies de l'information — Télécommunications et échange
d'information entre systèmes — Réseaux locaux et urbains — Exigences
spécifiques —*

*Partie 5: Méthode d'accès par anneau à jeton et spécifications pour la
couche physique*

*AMENDEMENT 1: Opération par dédicace d'anneau à jeton et milieux en
fibres optiques*

International Standard ISO/IEC 8802-5:1998/Amd.1:1998(E)

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to ISO/IEC 8802-5:1998 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 6, *Telecommunications and information exchange between systems*.
