**Industrial automation systems —  
Manufacturing message specification —**

**Part 3:**

Companion standard for robotics

**AMENDMENT 2: Revision to conformance**

*Systèmes d'automatisation industrielle — Système de messagerie  
industrielle —*

*Partie 3: Norme d'accompagnement pour la robotique*

*AMENDEMENT 2: Révision pour conformité*

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 2 to International Standard ISO/IEC 9506-3:1991 was prepared by Technical Committee ISO/TC 184, *Industrial automation systems and integration*.
