
**Information technology — Software life
cycle processes — Configuration
Management**

*Technologies de l'information — Procédés de cycle de vie du logiciel —
Gestion de configuration*

Contents

1 Scope	1
1.1 Tailoring this Technical Report.....	1
1.2 Process roles	1
2 Conformance	1
3 Normative references.....	1
4 Definitions.....	2
5 Symbols (and abbreviated terms)	3
5.1 Abbreviations and acronyms	3
6 SCM Process Implementation.....	3
6.1 Initiating and defining the scope.....	3
6.1.1 Defining the inputs to the SCM Process.....	3
6.1.2 Defining the resources and constraints to the SCM Process	3
6.1.3 Allocating responsibility and authority.....	3
6.1.4 Criteria for selection of SCIs.....	4
6.1.5 Defining the outcomes from the SCM Process	4
6.2 Planning.....	4
6.3 Controlling execution.....	5
6.4 Review and evaluation of the SCM Process.....	5
6.5 Closing	5
7 Software configuration identification.....	5
7.1 Identifying SCIs	5
7.2 Identifying software configuration baselines.....	6
7.3 Identifying software libraries.....	6
7.4 Advancement status	6
8 Software configuration control.....	6
8.1 Proposing changes.....	6
8.2 Evaluating the impact of proposed changes	7
8.3 Implementing the changes	7
8.4 Communicating the disposition.....	7
8.5 Closing the changes.....	7
9 Software configuration status accounting.....	7
9.1 Recording the identification.....	7
9.2 Tracing changes	7
9.3 Reporting status accounting records.....	8
10 Software configuration evaluation	8
11 Software release management and delivery.....	8
11.1 Handling	9
11.2 Storing.....	9
11.3 Replicating.....	9
11.4 Packaging.....	9
11.5 Delivering.....	9
12 Interface control.....	10
Annex A (normative) Mapping of clauses between ISO/IEC TR 15846, ISO/IEC 12207 and ISO 10007.....	11
Bibliography	17
