BRIEF HISTORY

The ISO Recommendation R 336, *Plain end steel tubes, welded or seamless—General table of dimensions and masses per unit length*, was drawn up by Technical Committee ISO/TC 5, *Pipes and fittings*, the Secretariat of which is held by the Association Suisse de Normalisation (SNV).

Work on this question by the Technical Committee began in 1957 and led, in 1961, to the adoption of a Draft ISO Recommendation.

In August 1961, this Draft ISO Recommendation (No. 461) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Australia	France	New Zealand
Belgium	Germany	Norway
Brazil	Greece	Spain
Burma	Hungary	Sweden
Czechoslovakia	India	Switzerland
Chile	Israel	United Kingdom
Denmark	Italy	Yugoslavia
Finland	Netherlands	

One Member Body opposed the approval of the Draft: U.S.S.R.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in September 1963, to accept it as an ISO RECOMMENDATION.

BRIEF HISTORY RELATING TO THE SECOND EDITION

A draft revision of this Recommendation was then studied by Technical Committee ISO/TC 5 and, in 1971, the P-Members of the Committee instructed the Secretariat to submit the Draft to the ISO Council under the abbreviated procedure provided for in clause F.7.1 of the Directives for the Technical Work of ISO.

This draft revision was then submitted by correspondence to the ISO Council which decided to accept it as the second edition of ISO Recommendation R 336.
