BRIEF HISTORY

The ISO Recommendation R 635, *Code of Symbols for Covered Electrodes for Arc Welding of Mild Steels and Low Alloy High Tensile Steels*, was drawn up by Technical Committee ISO/TC 44, *Welding*, the Secretariat of which is held by the Association Française de Normalisation (AFNOR).

Work on this question by the Technical Committee began in 1953 and led, in 1957, to the adoption of a Draft ISO Recommendation.

In September 1957, this Draft ISO Recommendation (No. 178) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies:

Bulgaria	India	Portugal
Burma	Israel	Romania
Czechoslovakia	Italy	Spain
Denmark	Japan	Sweden
Finland	New Zealand	Switzerland
France	Norway	United Kingdom
Greece	Poland	Yugoslavia

Four Member Bodies opposed the approval of the Draft.

Belgium
Netherlands
Republic of South Africa
U.S.S.R.

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in November 1967, to accept it as an ISO RECOMMENDATION.
