Guidance on airway management during laser surgery of upper airway

*Guide pour assurer la ventilation au cours d'opérations par laser des voies
respiratoires supérieures*

Reference number
ISO/TR 11991:1995(E)

Contents

	Page
1 Scope	1
2 References	1
3 Terminology	2
4 Ideal properties of tracheal tubes for use with lasers.....	3
4.1 Materials	3
4.2 Design.....	3
4.3 Packaging and labelling.....	4
5 Description of current practices which reduce the risk of airway fire.....	4
5.1 Non-intubation techniques.....	4
5.2 Intubation techniques	5
5.3 Management of airway fires	10

Tables

1 Combustion properties of conventional tracheal tube materials.....	11
2 Primary emergency management following recognition of airway fire...	11
3 Secondary emergency management following recognition of an airway fire	12

Annex

A Bibliography	13
