
Rubber — Trapping and identification of volatile components of rubber fumes with active sampling on a poly(2,6-diphenylphenylene oxide) type sorbent, using thermodesorption and gas chromatographic method with mass spectrometric detection

Caoutchouc — Piégeage et identification des composés volatils des fumées de procédés du caoutchouc, par échantillonnage actif sur un sorbant de type poly(oxyde de 2,6-diphénylphénylène), en utilisant une méthode par thermodésorption et chromatographie en phase gazeuse avec détection par spectrométrie de masse
