

Guide to effects of current on human beings and livestock —

Part 3: Effects of currents passing through the body of livestock

ICS 13.260

National foreword

This Published Document reproduces verbatim IEC 60479-3:1998. The IEC publication is issued in the form of a Technical Report Type 2 for provisional application so that information and experience of its use in practice may be gathered. In IEC, it has the status of a basic safety publication.

The UK participation in its preparation was entrusted to Technical Committee PEL/64, Electrical installations, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
