

BSI Standards Publication

Case studies supporting IEC 62232 —
Determination of RF field strength,
power density and SAR in the vicinity of
radiocommunication base stations for the
purpose of evaluating human exposure

National foreword

This Published Document is the UK implementation of IEC TR 62669:2026. It supersedes PD IEC TR 62669:2019, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee GEL/106, Human exposure to low frequency and high frequency electromagnetic radiation.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.
